

WHY CLIPRAIL?

- Fastest and easiest product to lay for screeded floors
- Clips together for fast installation and minimal fuss
- Small, lightweight clips are easy to handle and move around on site
- Pipe centres give excellent heat output

PRODUCT DESCRIPTION

ClipRail is the perfect choice for projects needing an economical and fast to install in screed system without compromising heat output and warm up times. ClipRail is also particularly suited to large ground floor installations where screed can be laid.

A specifically designed 133mm centre clip system ensures the system locates together to make it easy to lay a serpentine pattern without sacrificing pipe or having to lay large amounts of bedding material.

The 133mm pipe centres help to distribute the heat evenly and give the system a high heat output.

SPECIFICATION

Rail dimensions: 266mm long

Pipe: 12mm PE-RT

Pipe centres: 133mm
